INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/GB 03/03236

Re Item IV

Lack of unity of invention

The subject-matter of independent claim 1 is already known (see the grounds for this objection in Item V). The requisite unity of invention (Rule 13.1 PCT) therefore no longer exists inasmuch as a technical relationship involving one or more of the same or corresponding special technical features in the sense of Rule 13.2 PCT does not exist between the subject-matter of the following groups of inventions claimed as alternatives in present claim 1.

The application relates to a plurality of inventions, or groups of inventions, in the sense of Rule 13.1 PCT. They have been divided as follow:

- 1) A method for the production of a library of heparan sulfate derivatives, said method comprising a chemical modification step specially characterised in that the step is selected from the steps A or B.
- 2) A method for the production of a library of heparan sulfate derivatives, said method comprising a chemical modification step, specially characterised in that the step is selected from the steps C or D.
- 3) A method for the production of a library of heparan sulfate derivatives comprising a chemical modification step, specially characterised in that the step is selected from the steps E or G.
- 4) A method for the production of a library of heparan sulfate derivatives comprising a chemical modification step, specially characterised in that the step is selected from the steps F or H.
- 5) A method for the production of a library of heparan sulfate derivatives comprising a chemical modification step, specially characterised in that the step is selected from the steps I or J.
- 6) A method for the production of a library of heparan sulfate derivatives comprising a chemical modification steps, specially characterised in that the step is selected from the steps K to O.
- 7) An undefinite number of possible methods for the production of libraries of heparan sulfate derivatives comprising a combination of chemical modification

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/GB 03/03236

steps, specially characterised in that the steps are selected from the group A to O.

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

D1: DATABASE BIOSIS BIOSCIENCES INFORMATION SERVICE,
PHILADELPHIA, PA, US; WU ZHENGLIANG L & AL: "A NEW STRATEGY
FOR DEFINING CRITICAL FUNCTIONAL GROUPS ON HEPARAN'
SULFATE" XP002268531

D2: US-A-6 127 347 (HOLME KEVIN R ET AL) 3 October 2000 (2000-10-03)

- 1- Claim 1 is directed to a method for preparing a library of heparan sulfate derivatives. D1 discloses the preparation of a heparan sulfate library by desulfating and resulfating heparin (steps A and/or B and E and/or G). D2 discloses the N-desulfation of heparin (steps A and/or B). The common inventive concept linking the various alternatives, i.e. "a method for the production of a library of heparan sulfate derivatives comprising at least one chemical modification step " is already known from the available prior art.
- 2- Article 17(3)(a) PCT stipulates that the ISA shall establish the International Search Report on those parts of the international application which relate to the invention first mentioned in the claims ('main invention') and for those parts which relate to inventions in respect of which the additional fees were paid. In the present case, the additional fees have not been paid and the ISR will relate to the first group of inventions mentionned in the previous Item IV.

3- Novelty:

In view of D1 and D2, the subject-matter of this first group is not new.

4- Inventive step:

Provided novelty could be established over D1 or D2, then the question will be raised which technical problem has been solved by the present application since a particular biological activity was not mentionned (see claim 16). Thus an inventive step could not be established.

PCT/GB 03/03236

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

Re Item VIII

Certain observations on the international application

The expression "library" has no generally accepted definition. In this Report it is interpreted in the meaning of a "collection" (Article 6 PCT).
